

in Year 4!

Sound has been our focus in science this month and children have been learning about vibrations through different materials and what really goes on in our ears. The class showed a particularly keen interest in identifying the pitches of sounds.

This Month's Super Learners

Sidney Sussex

Alanna

Lexie

Vanessa

Frankie

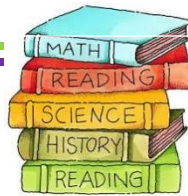

Emma

Zehra

In English, children have written thrilling newspaper reports about a fierce dragon attack right at our very school. Hard hitting headlines and eye witness quotes have played a huge role in our writing.

Children have been able to use our production of dragon days to help them create their dragon-based report.

In other news, it has been a very busy half term with our Dragon Days performances to the school and parent s/carers. We have also been lucky enough to visit the MAA and learn about the Trumpington burial site where a young Anglo-Saxon girl was found. Ask us about what we have learnt!

We have continued to work on our fractions unit and have moved on to consider equivalent fractions and how to subtract and add fractions together.

The highlight for the class was creating their very own fraction wall!
