

# APRIL in Year 5

In Science this half term, we have begun our unit on animals including humans. In our first lesson we talked about our key scientific vocabulary, and what the life cycle of a plant might look like.

These words include: germination, pollination, fertilisation and distribution. Ask your child what order they might go in!

**This Month's Super Learners:**

**Sienna M**

**Ece**

**Liam**

**Ekin**

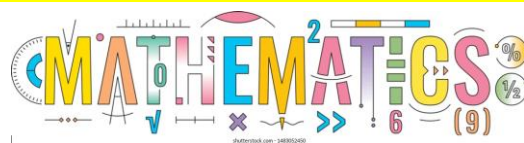

In English this month, we have begun our unit on portal stories where a character is transported to another place. We have looked at what makes a successful portal story and the use of prepositions to ensure we are moving the story along.

In grammar, we have been working on embedded clauses. This is a clause in the middle of the sentence in between 2 commas that you can remove, and your sentence still makes sense.

Ask your child what examples of portal stories they can think of!

In Art this half term, the children will have the opportunity to build their own mini building. We are looking at architecture, and the different styles of buildings we can see.

Here are some of our 'mock-ups' for our buildings. We cannot wait to show off the final pieces!

In Maths this month, we have continued with our work on decimals. We used our knowledge of fractions and decimals to understand percentages.

We also had a visit from the NSPCC about keeping children safe. We got to talk about safe adults, complete a booklet and meet a 'real speech bubble!'
