

APRIL in Year 4

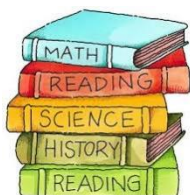

We have begun our new science topic "What a state!". This month children will be looking at the different features of solids, liquids and gases. We have lots of exciting experiments up ahead!

This Month's Super Learners

Lucas Frankie

Ellie Himasha

Alanna Hoja

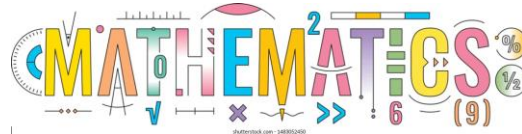

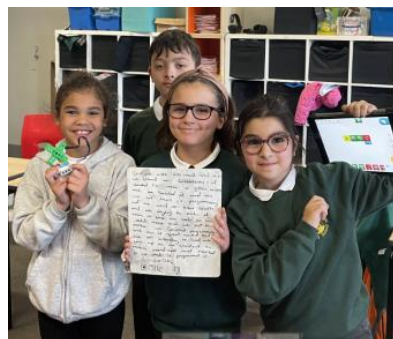

We have been inspired by the book Varjak paw and are creating our very own narratives with characterization.

Looking back on the descriptive devices we have already learnt, children have been creating vivid characters and descriptions.

In other news, we have begun an exciting computing unit and have been trying our hand at coding using Lego We Do kit.

It has involved lots of problem solving and trial and error but is definitely a highlight of our month!

In maths, we have been introduced to decimals. Children have been using place value charts and part-whole matters to consider different values.

We have been particularly keen on making sure we are looking after our decimal point and that it is in the right place!
