

in Year 5

SCIENCE *

This month in Science, Year 5 have been learning about dissolving. We made jelly and discussed what the control, independent and dependent variables were.

We also made electrical circuits relating to conduction and insulation. The children created electrical circuits and placed items in the circuit to see if they conducted or insulated electricity.

This Month's Super Learners

Progress:

Karolina, Eric, Ana, Antoni

Achievement:

Liam, Sienna M, Ece, Logan

Reader of the Month:

Sophie

In English, we have been writing diary entries relating to our topic, 'Magic in the Making'.

The children used a variety of skills to write about their first Quidditch match as if they were Harry Potter.

Here is a wonderful piece of writing:

Diany Tangels		
Huld		Spicy
mosen and past	Include stary wolfers thoughts and feetings (parenthesis and exclamations)	Include figurative danguage (eq. power of three/expanded noun phrases)
ain atronological using time biols and include a	Maintain informal lone (e.g. Abrough use of contractions)	Use relative clauses
d sentence nation (nan- lable)	Show belonging through possessive apostrophes	Use a receive of sentence structures including a range of fronted advertists Remember to

We also enjoyed a trip to Harry Potter World, where we learned all about how to distress clothing, and even made our own.

We saw real props, costumes, sets and makeup used in the films, and the children had a wonderful time.

"It was tiring, but I really enjoyed it. It was enormous, we all had a lot of fun." – Ece.

This half term in Maths, Year 5 have been learning to multiply by 10, 100, and 1000. We have been using that knowledge to use long multiplication, which the children have worked really hard to understand.

We have also learned about prime numbers, square numbers, factors and multiples.
