

in Year 4

This month, we have looked at classification and habitats, children have created their own food webs and classification systems inspired by Carl Linnaeus. We used sweets to have a go at creating our own classification keys:

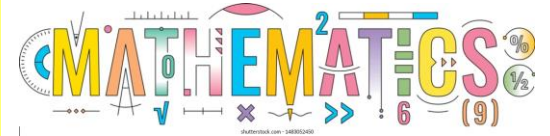

Children have written their very own take on Greek myths this month! After reading a plethora of myths such as Pandora's Box, Perseus and the Minotaur and Pegasus, we have created our own heroes and villains as well as mythical beasts. Children have been particularly creative when describing their creatures: "It was as ugly as a gargoyle, with teeth as sharp as knives and piercing eyes like emeralds." "It screeched like a banshee when they approached..." "It had tall, thin legs, with see-through bones. It looked as though it had never eaten."

This month we were lucky enough to visit the Fitzwilliam museum. Linking to our topic of the ancient Greeks, we met a museum expert who talked us through a collection of ancient pottery and their purposes. We were then able to explore the galleries and sketch our favourite art pieces.

This Month's Super Learners

Kaysharna Zehra
Selina Alanna
Vanessa Lexie

Recently, we have been focusing on our times tables with a focus on threes, sixes and nines. We have worked with a variety of problems such as two-step word problems as well as classic times table drills. The class have particularly enjoyed our multiplication think boards.
