

# in Year 5

This month in Science, we have been investigating how powders reacts with different solutions. We conducted a mystery activity where the children had to figure out who had left footprints all over the classroom! We are now all prepared for our new topic: Space!

We really enjoyed our trip to Cambridge Arts Theatre to watch their pantomime, 'Mother Goose'. Congratulations to Sienna and Nicholas who were chosen to go on stage and won Cambridge United tickets (among other things) for their contributions.

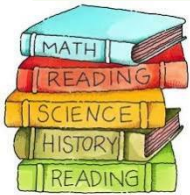

## This Month's Super Learners

**Achievement:**  
Alya, Priya  
L'Wren

**Progress:** Niv,  
Bonnie

**Reader of the Month:** Antoni

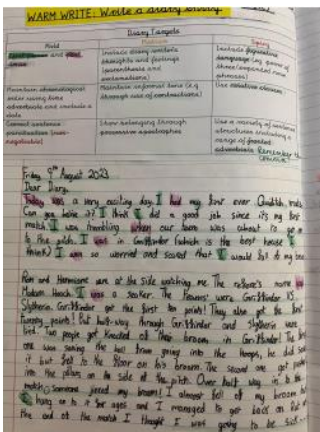

In English this month, we have been working on persuasive writing.

We worked hard on our modal verbs to persuade the reader to NOT attend Hogwarts School of Witchcraft and Wizardry, and we applied this knowledge to writing our own text to persuade someone to come to our school!

We also wrote some diary entries about Hogwarts.

Here is some superstar writing:

In Maths this month, we have been finishing our work on Multiplication and Division, and the children learnt how to calculate 4 digit by 3 digit numbers using long multiplication! Check out this wonderful presentation:

We then moved on to area and perimeter, and the children have been working to calculate the perimeter of composite shapes!
