

# in Year 4

In Science, we have continued to learn about habitats and food chains. Recently, we completed an experiment looking at land ice and sea ice. From this experiment, we learnt about how temperature can affect the sea level.

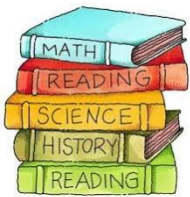

## This Month's Super Learners

Freya      Lyncoln

Kendra      Hoja

Milly      Tyler

The Whole Class!

In English, we have been writing our own non-chronological reports. We have built on our knowledge of first, second and third person as well as using generalisers and exciting sentence starters to hook a reader in.

We did lots of fact hunting in order to gather information for our non-chronological reports

It has been a very busy month with lots of fabulous activities.

We were lucky to have Christmas jumper day on the day our class visited the Cambridge Arts theatre to watch 'Mother Goose'. Their behaviour was exemplary and we received compliments from other schools!

Continuing the festive theme, we have also been able to watch the KS1 and Reception plays which we thoroughly enjoyed.

We have been continuing our work on multiplication and division and have now covered all the times tables in class. However, this is not the end for our times tables as we will be continuing our unit after the break.

The children have been able to represent their times tables in a variety of ways including bar models as well as with dienes and bead strings.
