

# IN YEAR 2

## THIS MONTH'S SUPER LEARNERS:

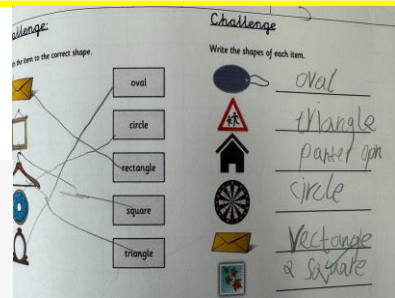

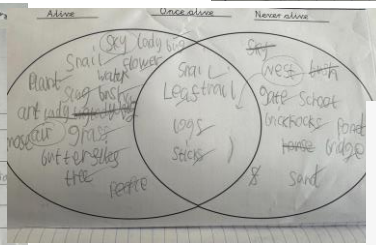

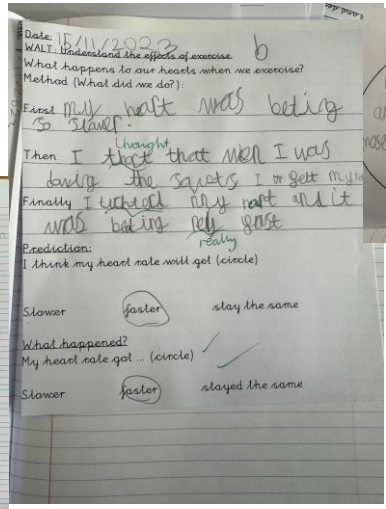

**Mya-** She has been a great asset in Fitzwilliam class and has been working hard! Well done Mya, we are very proud of you!

**Arwa Saleh** for trying her hardest and working well in every subject. She always has a smile and is such a kind member of our class.

In Kings and Fitzwilliam class, children have been familiarising themselves with 2D and 3D shapes. They have learnt some of the name and counted how many sides and vertices they each have. They had fun when sorting them into different groups depending on their characteristics.

Children in Year 2, have written their own Non- Chronological reports about the planet on which we live: Earth. They also have been familiarising themselves with the play script for the KS1 Christmas Performance. They all have a part in the play so please encourage your child to practice their lines at home.

In Science, we started a new unit "Animals including humans". We explored how exercise is beneficial for us and we carried out experiments to put these into practice and compare the beat of our hearts before and after exercise. What a very interesting topic this is!
