Our Superstar Learners

Progress Award –
Cerise, Muhammad,
Iris, Ranin, Nelli

Achievement Award – Louie,
Sophia, Belle, Louie,
Elijah, Joseph

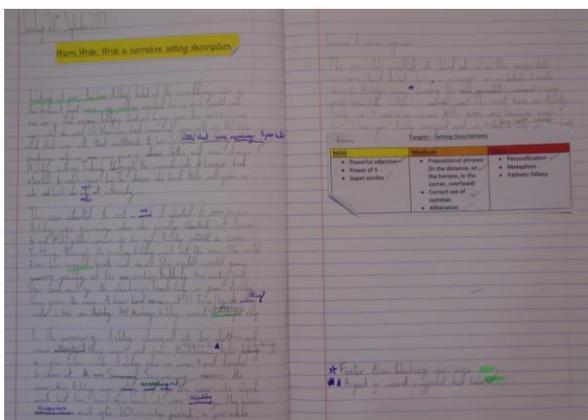

Reader of the month: Marianne,
Felix

We've begun maths with some excellent work on place value (up to one million) - checking that we understand that while a digit can be the same, its value depends on where it is in the number! Here's some children from Churchill Class working hard.

Science lessons have begun well, we started by looking at lots of different materials and grouped them according to their properties. Using this knowledge, we've been answering questions (and having fun conducting experiments) to find out: Which material will stop an ice-lolly melting on a summer's day, and what helps hot chocolate to dissolve in water quickest?

In English, we have been immersing ourselves in all things Harry Potter, using settings from the series as we start the term learning about writing 'setting descriptions'. We've focused on improving our writing skills with lots of visualisation and imagery techniques - transporting our readers to another place! Here we are reading our work to objects outside to check for cohesion and help us with our editing. You can see Willow's editing to the left.
