# Owl Pellet Dissection

Join us to dissect an owl pellet. Become a wildlife monitor for the day, reporting back to our research team on which species our local owls have been hunting! We will carefully break up the pellet, clean and compile the skeletons inside and identify which species they belong to. Maybe there will be more than one!

We will be working in a small group inside our classroom. Stay on to explore the nature reserve, build dens, go minibeast hunting and enjoy a picnic.

**Date: Friday 31st May, 10.30am - 12.30pm**

**Price: £5/7.50 per child plus booking fee.**

**Location: Ramsey Heights Nature Reserve, Chapel Road, PE26 2RS.**

**Book online: [wildlifebcn.org/events](http://wildlifebcn.org/events)**
