

# FEBRUARY in Year 4

In science, our unit of electricity continued. Our most recent experiment saw the children changing the components such as adding more bulbs or batteries and observing the effects that had. Many children have thoroughly enjoyed this unit in Science, showing new found inquisitiveness and a brilliant attitude toward hands on work!

## This Month's Super Learners

Akos Amelia  
Milly Katie  
Ema Alanna

The class have finished their unit on warning stories and produced some brilliant pieces of work. Using short sentences to build suspense and speech to move their stories forward, we had many brilliant stories!

Using a variety of descriptive devices, the class were able to really bring their settings to life and were even able to use AI to generate images of their locations.

More recently, we have started to work on this year's production "Dragon Days" and have been working incredibly hard on learning lines as well as songs for the performance.

The children have shared how excited they to perform for you all and cannot wait to show those at home what they've done!

Our confirmed dates for the play are the following:

20<sup>th</sup> March at 2pm

25<sup>th</sup> March at 9:30am

Children have moved on to fractions this month and have been working on understanding the whole and mixed numbers.

They have used a variety of hands on activities to learn this such as Numicon, counters, dominoes and even oranges!

The class have said that they particularly enjoyed making their own fraction names.
