

in Year 3

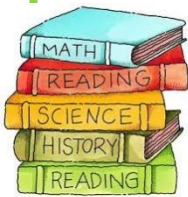

In science, our topic has been forces. We started off by thinking about what makes things move and enjoyed finding out about friction.

This Month's Super Learners

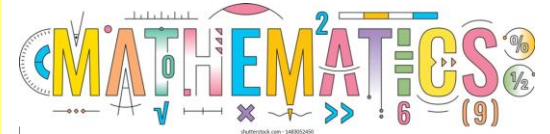

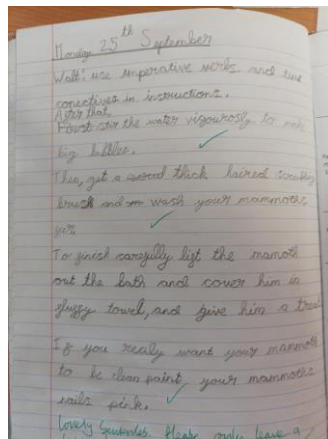

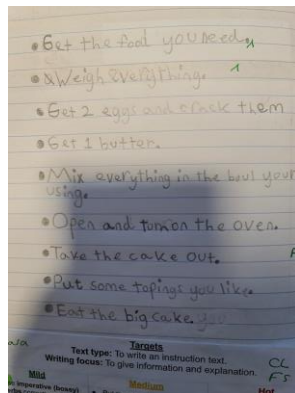

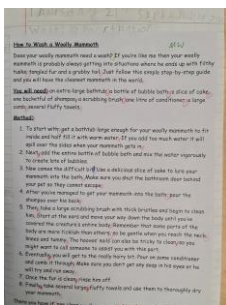

Progress: Elizan, William C, Marysia, William E-P, Oliver, Riley

Achievement: Olivia, Jasmyn, Jorja, Zoe M, Harrison, Lara

In English, we have been learning about how to write instructions. Our model text is "How to wash a Woolly Mammoth" – we don't think we would have enough room at home to do this!

We started off by learning the model text and identifying its features before writing a class version. Next week we will write our own instructions independently.

In maths, our first topic of the year has been place value. We have been practising to read, write and say different numbers, as well as placing them in order.

We have worked hard to place numbers on a number line and to find missing numbers in a sequence. Our knowledge of times tables has really helped us with this.
