

# JANUARY

# in Year 4

This half term, we began our new science unit on electricity. Recently, we have been testing different materials around the classroom to see if they are conductors or insulators.

This half term, we have been creating our own persuasive leaflets. We have learnt to use a variety of writing tools such as rhetorical questions, superlatives and imperative verbs to grab the reader's attention.

We particularly enjoyed creating our own incentives such as 99% off entry and free jumpers to convince readers to visit their location.

We have had leaflets written for a range of locations ranging from Alton Towers to our very own school.

In PSHE, we have been working on our team work skills such as active listening and taking turns.

We have thought a lot about how we can be the best team player and support others in our group as well as consider what can make working with other people tricky some times.

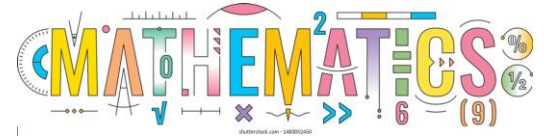

## This Month's Super Learners

Lucas Vanessa

Lilia Heidi

Himasha Joseph

Katie Angelos

Continuing with multiplication and division, children have been working on using bigger numbers in their sums such as dividing a 3 digit number by a 1 digit number. We have used our knowledge of the times tables to help us with this.

Sidney Sussex have also taken part in a mock multiplication times table check (MTC) in preparation for the real MTC in the summer. The results have shown a fantastic improvement in times table knowledge within the class. Remember to keep practising at home!
