Isabella, Oliver,
Vishnu, Azra

Reader of the month

Omar & Arzo

MATHEMATICS

Looking more into multiplication and division, children have explored a plethora of different methods- children in Trinity have said that they enjoy the grid method the most!

ART

Weaving has been a huge hit with children in Wolfson Class, with lots of children asking to make a second piece!

SCIENCE

Looking at sound, we have had some brilliant experiments this month! The pitch test has been a massive hit with children to test their listening skills.

English!

In English, we have been creating suspense using the weather. Wolfson have had 'the fog slowly creeping in' while Trinity have used 'crashing waves and rain' to set the scene. The hot seating activity was a class favourite this month.
