

Let's Play in a Schematic Way

Cambridgeshire Early Years, Childcare and School Readiness Service are delighted to offer an introduction to schema within the early years

The aims of the course will support practitioners to:

- Understand what schemas are.
- Develop knowledge about the importance of schema.
- Learn about different types of schema that fascinate children.
- Best support these and ideas for practice.

Environmental Sustainability in the Early Years

Tuesday 4th March 2025 - 9am-4pm
Grafham Water

Did you know that all Early Years settings need to have a climate action plan by September 2025?

A full days training including all of the resources you need to start your climate action plan

As the caretakers of the planet for the young children in our care, what actions can we be taking to ensure we create an early education system that embeds climate responsibility in everything we do?

This session will consider current DfE policy and initiatives within wider environmental targets, opportunities and wider resources, with a deep dive into nature connection and soil as a living organism. We will consider pedagogical approaches to support practise.

It will also include practical considerations of the Sustainable Development Goals and a tried and tested early years curriculum for living: care for ourselves, our community and our planet.
