

# APRIL in Year 2

This month in Science, we finished our unit on *Living Things Including Humans*, learning about lifecycles and testing what type of habitat a woodlouse would live in. We have begun our unit on *Plants* and we are growing our very own beanstalks which have almost sprouted! We have been exploring what plants need in order to survive.

In English, we wrote a wishing tale based on the story 'Lila and the Secret of Rain.' The children loved coming up with their own wish to write about.

More recently, we have been writing explanation texts on how our dream potions work. We explored the steps the BFG followed when he made his dream potions and the children then came up with their own dream potions. They loved making their own dream jars!

## This Month's Super Learners

This month's super learner in Kings class is Leo! Leo works hard and tries his best. He has been concentrating extremely hard when completing his independent work.

This month's super learner in Fitzwilliam class is Triumph. Triumph has been trying really hard with his writing and has felt very proud of himself.

In Maths, we have been learning about fractions. The children are able to recognise and find  $\frac{1}{2}$ ,  $\frac{1}{4}$  and  $\frac{1}{3}$  of an amount of objects and a number. We further explored non-unit fractions and calculated various fractions of different numbers.
