

# APRIL in Year 2

This was a busy month in Year 2. For Science we are learning about plants, so we did some planting ourselves!

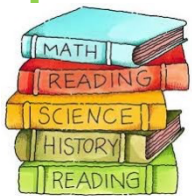

With the help of a parent, each child was able to plant a tomato plant and would be responsible for caring for it and watching it grow. Everyone is super excited and looking forward to the eating!

Thank you to our parent helper!

## This Month's Super Learners

Well done to and Samuel and Thomas for some brilliant work and for each receiving an Achievement Certificate this month.

Well done to Ayah and Marc for their good progress this month and for each receiving a Progress Certificate.

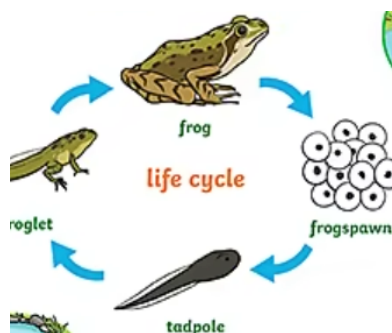

This month we continued to develop out reading and comprehension skills by using a variety of fiction and nonfiction texts.

We are very pleased to say that we are making good progress in relation to using the text as evidence when answering questions.

We are working hard at understanding and using more interesting vocabulary.

In Writing we have been exploring the key features of explanation texts. We have learnt some interesting facts and vocabulary and have written about how the Life Cycle of a Frog happens.

In Maths, we explored Fractions and Measurement.

We learned to identify  $\frac{1}{2}$ ,  $\frac{1}{3}$  and  $\frac{1}{4}$  and to find fractions of quantities. We also worked with some non-unit fractions.

In Measurement we got some 'Top Tips' for measuring and have explored how to measure length and height using CM and M.
