

Name: _____ Class: _____

Select the statements that offer a justification for the argument that children should or shouldn't play video games.

- a** Computer games can be educational. They teach problem solving, how to think logically and quickly process large amounts of data.
- b** Computer games distract children from doing their homework.
- c** Computer games can be addictive, they find it difficult to stop playing them.
- d** Computer games improve hand-eye coordination.
- e** Many games have thriving online and offline fan-bases, and encourage social communication.
- f** Some computer games are violent and inappropriate for children.
- g** Computer games may discourage children from playing outside.
- h** Too much playing on computer games can cause children to become withdrawn and overemotional.
- i** Children may be vulnerable to bullying with online computer games.
- j** Computer games teach a child how to win or lose. They can show that you need to lose sometimes, to be able to learn more.
- k** Computer games can improve focus and attention.

Arguments for children playing computer games.	Arguments against children playing computer games.
